Exp No:04 Lakshman Rithesh R (241501096)

Aim:

To design a suitable **data model and user-friendly forms** for a business application using Zoho Creator.

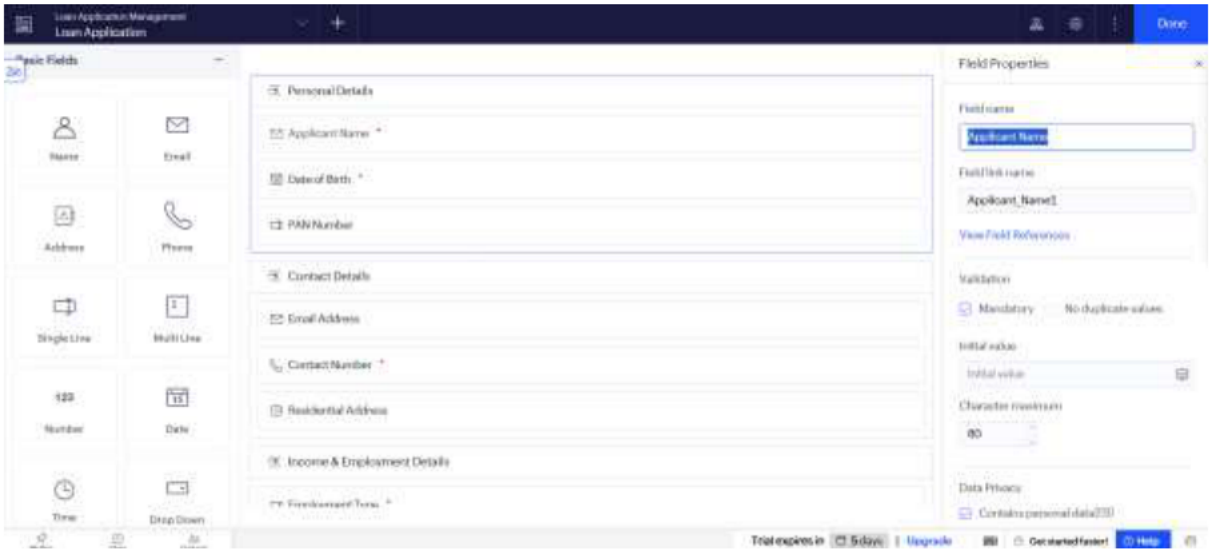

Requirements

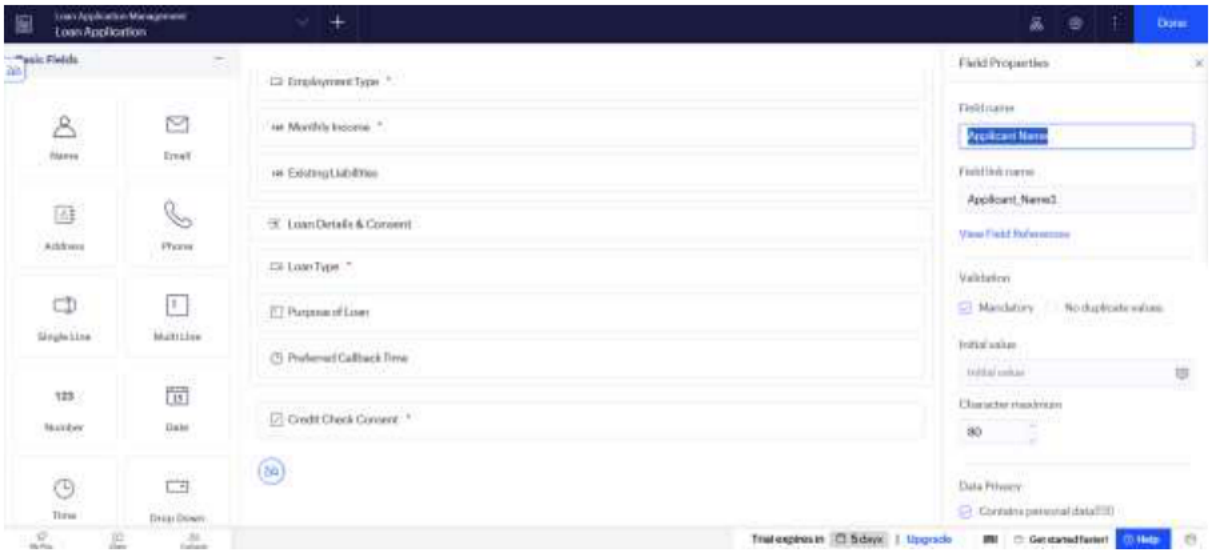

- Computer/Laptop
- Internet connection
- Zoho Creator account
- Web browser

Procedure

1. Log in to **Zoho Creator** and create a new application named **Loan Application**.
2. Create a blank form named **Loan Application**.
3. Add sections such as **Personal Details, Contact Details, Income & Employment Details and Loan Details & Consent**.
4. Drag and drop suitable fields such as **Name, Date, Email, Phone, Address, Number, Dropdown, Multi Line, Time and Checkbox**.
5. Configure field names, dropdown choices and mandatory fields.
6. Arrange the fields in a user-friendly order.

7. Save the form and enter sample loan application data.
8. Verify that the submitted data is stored correctly in Zoho Creator.

Result

A suitable **data model and functional forms** were successfully designed in Zoho Creator for a business application, demonstrating how low-code tools simplify data management and form development.
