EXP NO :09

Zia Analytics and AI-Assisted Insights for the Loan Application

Aim

To explore Zia, the AI assistant of Zoho Creator, and visualise loan application data using charts.

Application Design

1 Open the Loan Application Management app and explore Zia features such as AI fields and insights.

2 Create a chart report from the Loan Application data, grouped by Status.

3 Choose the pie chart type and view the percentage of applications in each status.

4 Refresh the chart to include the latest records.

5 Interpret the distribution to support loan decisions.

Output

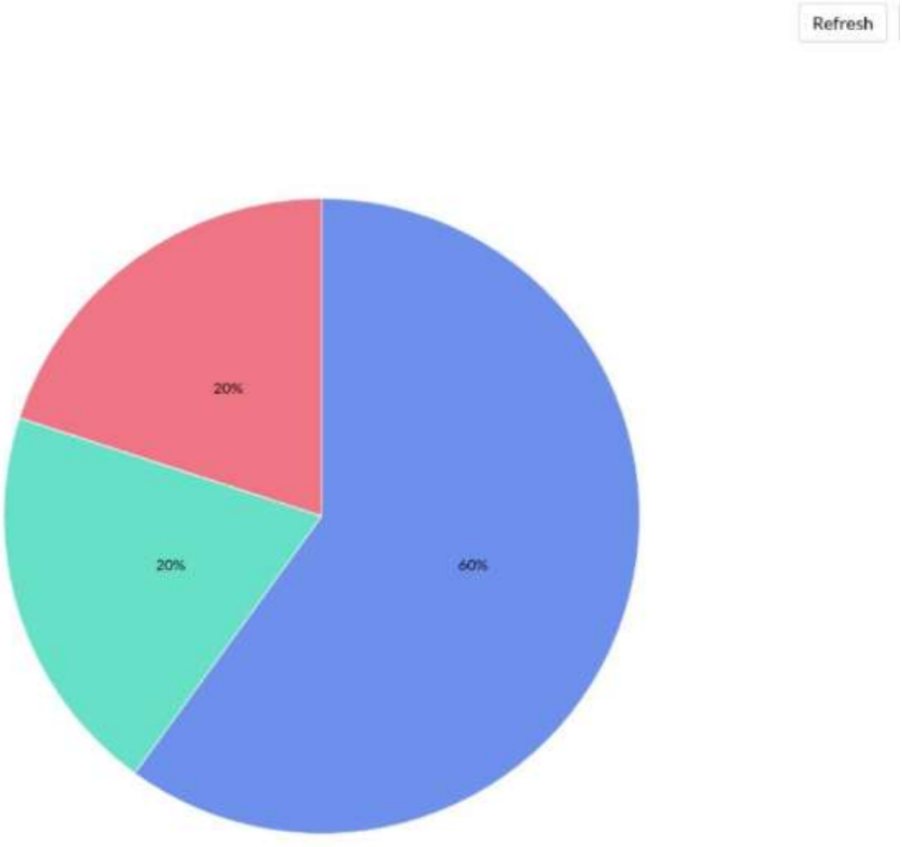

Figure: Pie chart showing distribution of loan applications

Observation

- The pie chart shows the share of applications by status, with one segment at 60% and two at 20% each.
- Visual summaries help reviewers understand the pending workload quickly.
- AI-assisted features can predict and summarise data to speed up decisions.

Validation

1 Add or change application statuses.

2 Refresh the chart and check that the percentages update.

Result

Thus, Zia features were explored and loan application data was analysed using a pie chart.
