EXP NO :12

Features and Governance in Zoho Creator

Aim

To study the features and governance controls of Zoho Creator, including consent, mandatory data and status control.

Application Design

1 Add a Loan Details and Consent section to the Loan Application form.

2 Add the fields Loan Type, Purpose of Loan, Preferred Callback Time, Status and Credit Check Consent.

3 Make Loan Type and Credit Check Consent mandatory so that the applicant must agree before submitting.

4 Set the Status field to Pending by default.

5 Review the environments, audit and permission options available for governance.

Output

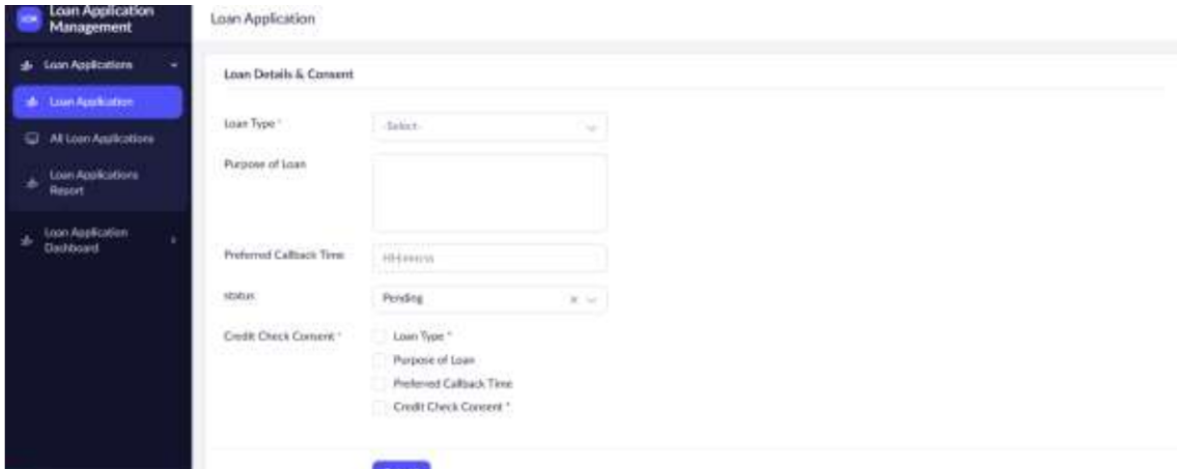

Figure: Loan Application form with Loan Details and Consent section

Observation

- The form records the applicant's consent for a credit check before the application is accepted.
- Default and mandatory fields ensure consistent, compliant data.
- Governance features control who can view and change application data.

Validation

1 Try submitting the form without selecting the consent checkbox.

2 Submit with all mandatory fields filled and check the record.

Result

Thus, the features and governance controls were studied and applied to the loan application.
